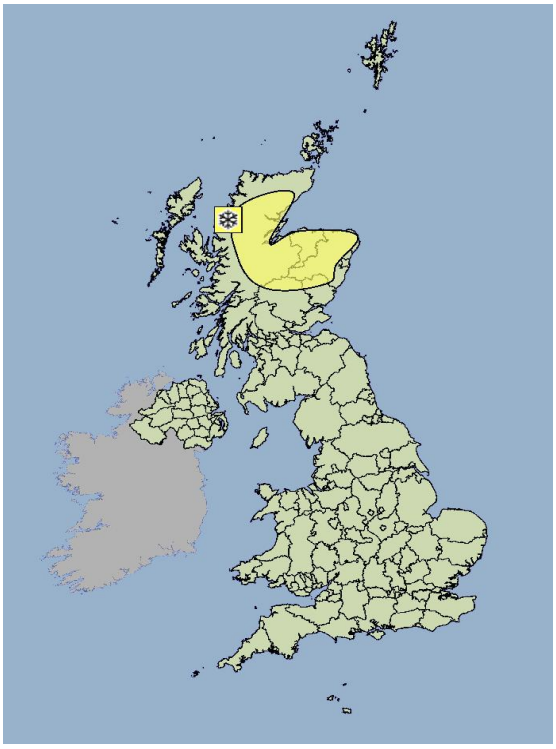
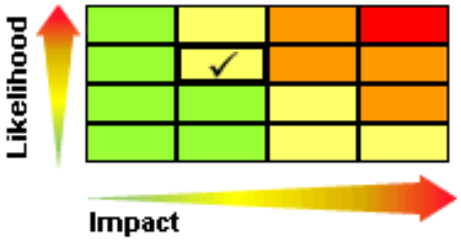
National Severe Weather Warning Service





Chief Forecasters Assessment
A change to much colder conditions will take place across Scotland during Sunday night and Monday morning, with showers turning increasingly to sleet and snow over hills. During Monday morning, an area of more persistent sleet and snow is expected to move south across the northern half of Scotland, with some roads across the Highlands and Grampians likely to be affected by accumulating snow.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **06:40 on Mon, 24th Apr 2017** until **15:00 on Mon, 24th Apr 2017**

An area of sleet and snow will move southwards during Monday morning. Heavier snowfall is expected to affect higher level routes where 2-5 cm of snow is likely to accumulate in places, whilst 1 to 2 cm is possible to lower levels.

Some transport routes may be affected, with journeys requiring longer travel times.

This is an update to extend the area at risk eastwards into the northeast of Aberdeenshire and delay the end of the warning until 1500 Monday afternoon. The sleet and snow will however clear from the northwest during Monday morning.
